

New York Stock Market

New York, January 31.—The financial community was interested chiefly to-day in the announcement that the Harriman companies would expend \$75,000,000 in the improvement of that system in connection with the double-tracking of its lines to San Francisco, and double-tracking portions of the Union Pacific and Southern Pacific.

Wall Street received the news to-day in the day to digest it thoroughly, but first impressions were favorable, and helped to impart a tone of strength to the market at the close.

The statement of the Steel Corporation for the final quarter of 1910, showing earnings of \$23,991,000, with net earnings of \$20,422,000, after the payment of the dividend, was not disappointing.

On the stock market the railroad issues, especially the Harriman and Hill stocks, were the conspicuous features. The morning session was dull and professional, with periods of uncertainty which presumably reflected doubt as to the character of the steel report.

The demand for bonds continued, through transactions on the Stock Exchange today were three times that of yesterday. The market was firm, total sales, par value, \$3,427,000. United States registered, advanced 1-8 on retail sales of stocks to-day, 488,200 shares.
